

Steps for making DNS Entry in Ubuntu14 Linux

```
1> vi /etc/resolv.conf  
2> add new line  
3> nameserver 164.100.17.3  
4> nameserver 164.100.3.1  
5> nameserver 164.100.10.18  
6> service network restart  
7> dig airsewa.aksamity.com
```

This command should display the actual IP of your server.
